EXPERIENCE

Freelance

Web Designer

Jan 2021 -

Feb 2021

michaeljfaris.com Designed and coded a portfolio website for a prospective architecture graduate. Developed the visual design and aesthetics of the site to match the personality and work of the client.

Rhode Island School of Design

Teaching Assistant

Sep 2020 -

Present

Worked for the Experimental and Foundation Studies Department at Rhode Island School of Design by assisting multiple Freshman drawing teachers, leading weekly class critiques, providing formative feedback to the professor, monitoring student progress and assisting students in accomplishing learning objectives.

SIDE PROJECTS

Spotted Redesign

Product Designer

Jan 2021 -

April 2021

Redesigned a mobile product and brand identity created by a product manager through BRIC. Led a three-month iteration of research, design, and prototyping. Worked beside a product manager to conduct user research, user testing, and implemented a new UI/UX design.

Spotify Mobile Case Study

Product Designer

Jan 2021 -

Feb 2021

haeminhwang.me/spotify.html Led a team to redesign Spotify's mobile app during a three week sprint. Spearheaded research, visual design, usability testing. Designed a solution to increase social engagement and sharing content within the mobile app.

Facebook Messenger Case Study

Product Designer

Dec 2020 -

Jan 2021

haeminhwang.me/messenger.html Designed a potential solution and feature for streamlining navigation and creating friendlier usability within the app. Used the design process to assist in going from a user problem to a solution. Took liberties in visual design and continued to reiterate the visual design of the feature during a three week exploration.

Portfolio Website

Web Designer

Oct 2020 -

Present

haeminhwang.me/website.html Designed and coded a personal portfolio website from scratch. Utilized HTML/CSS/JS to create a fully responsive site. Continued to refine and iterate the visual design and usability of the site to help potential clients and visitors navigate seamlessly within the site.
